Principles and methods were developed for how to conceptualise, assess and manage risk. These principles and methods still represent to a large extent the foundation of this field today, but many advances have been made, linked to both the theoretical platform and practical models and procedures.

### **Risk assessment and risk management: Review of recent ...**

Types of financial risk. Financial risk in business can be thought of very broadly as two types: internal risk and external risk. Internal risk results from poor management that leads to flawed operational processes and an inability to grow. External risk comes from competition, the overall market and changing customer needs.
