is a long-tailed, seed-eating parrot usually nicknamed the budgie, or in American English, the parakeet. Budgies are the only species in the genus *Melopsittacus*. Naturally, the species is green and yellow with black, scalloped markings on the nape, back, and wings.

Budgerigar - Wikipedia

While people are normally accustomed to seeing a variety of colored budgies for sale in pet shops, the only natural color of budgies in the wild is the yellow/green variety. All other budgies, including the blue budgies, white budgies, and others, are color mutations bred specifically for the pet trade. There's nothing wrong with these birds, but don't expect to see a blue budgie in the wild.

Learn All About Pet Budgie Birds

Part 1 Setting Up Its Home
1. Buy a big cage. Birds need to have some space to play and stretch their wings.
2. Budgies might defecate a lot but they also like to stay clean.
3. Add a few toys and perches of different thicknesses, shapes and textures.
4. Think about the room. Try to put the bird ...
