The Hydroflame 8525 is a furnace manufactured for campers, pop-tops and recreational vehicles. It uses 12 volts of direct current, along with propane, to power the fan and the heating elements. When power is applied, by lighting the pilot light and adjusting the thermostat, the small appliance warms the space.

Atwood Hydro Flame Furnace Won't Light: Causes And ...

Some common reasons why the Hydro Flame furnace in your RV isn't working include improper voltage levels, dirt inside the blower wheels, and malfunctions involving individual moving parts. If voltage levels at the furnace are too low, the blower will not have enough power to run and produce heat; if too high, the circuit breaker may trip.
