Plate Tectonics Paper Cutouts Activity: A Plate Tectonic Puzzle Introduction The Earth's crust is not a solid shell. It is made up of thick, interconnecting pieces called tectonic plates that fit together like a puzzle. They move atop the underly-ing mantle, a really thick layer of hot flowing rock.

Activity: A Plate Tectonic Puzzle Reproducibles of instructions and continent cutouts pages; Scissors; Glue or tape; Sheet of paper; Ruler or compass; Procedure Prior Knowledge. 1. Introduce students to the concept of continental movement and plate tectonics. Call on volunteers to tell what they know about plate tectonics.

Display a globe or world map.

Plate Tectonics Puzzle: Class Activity 4th/5th Graders | AMNH tectonic plate tectonic. Background: The plate tectonics theory suggests that Earth's crust is broken into many small pieces that move, and that the plate interactions result in earthquakes, mountain ranges,

volcanoes and the separation of continents. It took many years before this theory was accepted as a valid concept.
